

MJO average conditions
in Mar-Apr-May, 1974-2009

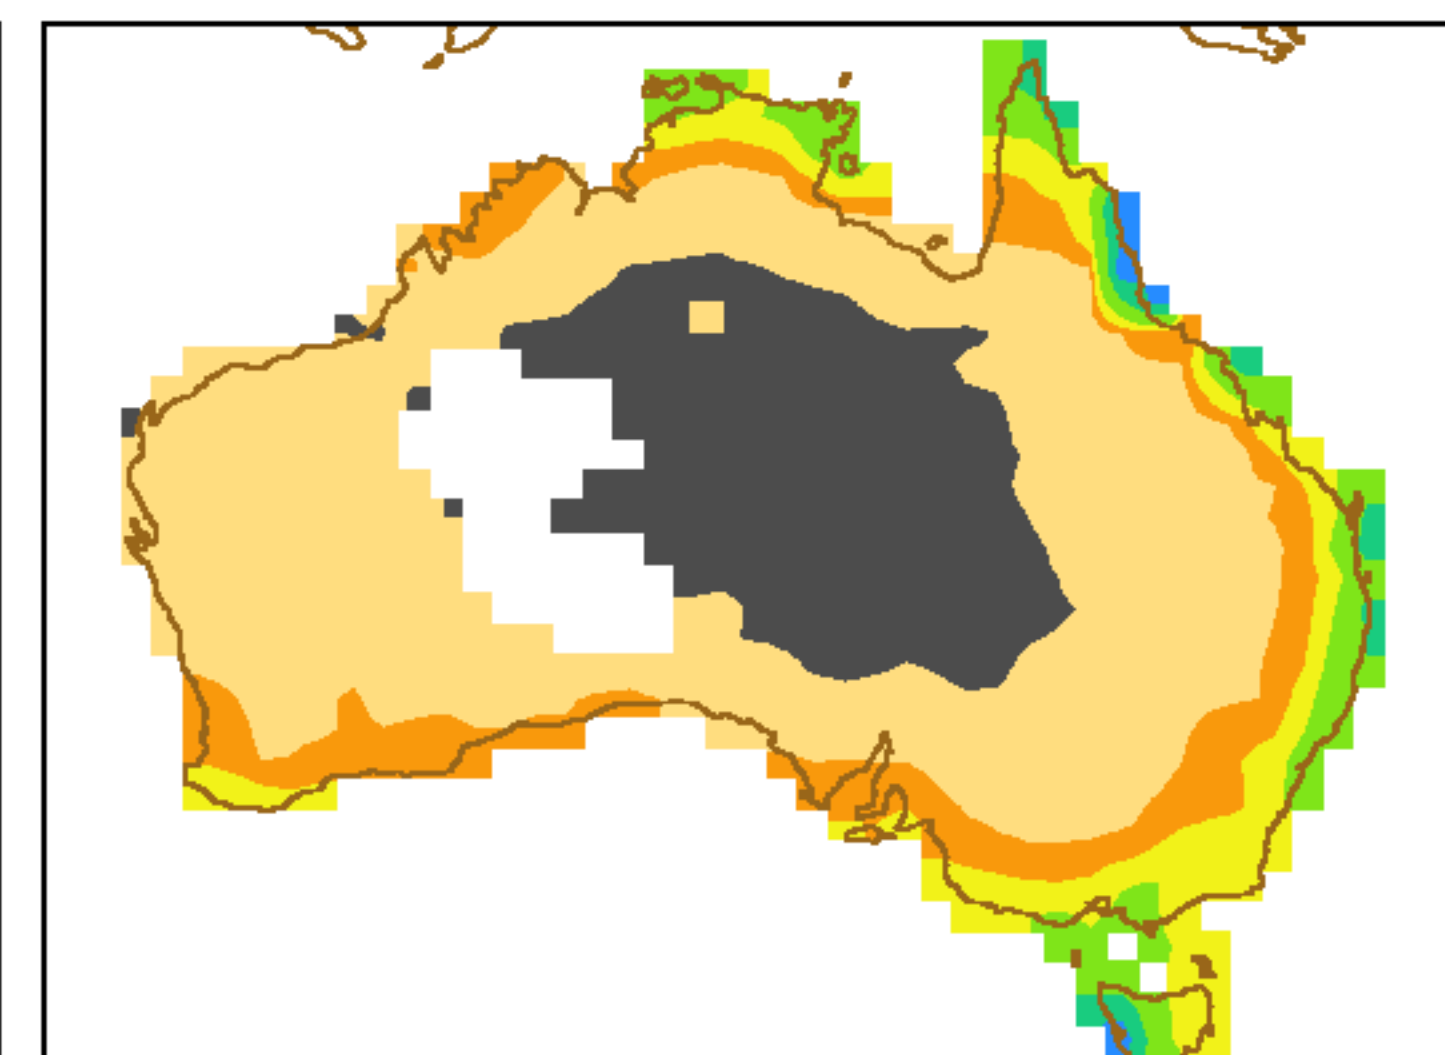

Rainfall odds
850 hPa wind anomalies

Rainfall odds shown as the chance
of weekly rainfall exceeding
the median in that MJO phase.

These calculations follow the
method provided in the paper
Wheeler, M., et al., 2009, Journal
of Climate, Vol. 22, 1482-1498.

Shading and vectors only shown
where statistically significant.
