

MJO average conditions  
in Nov-Dec-Jan, 1974-2009

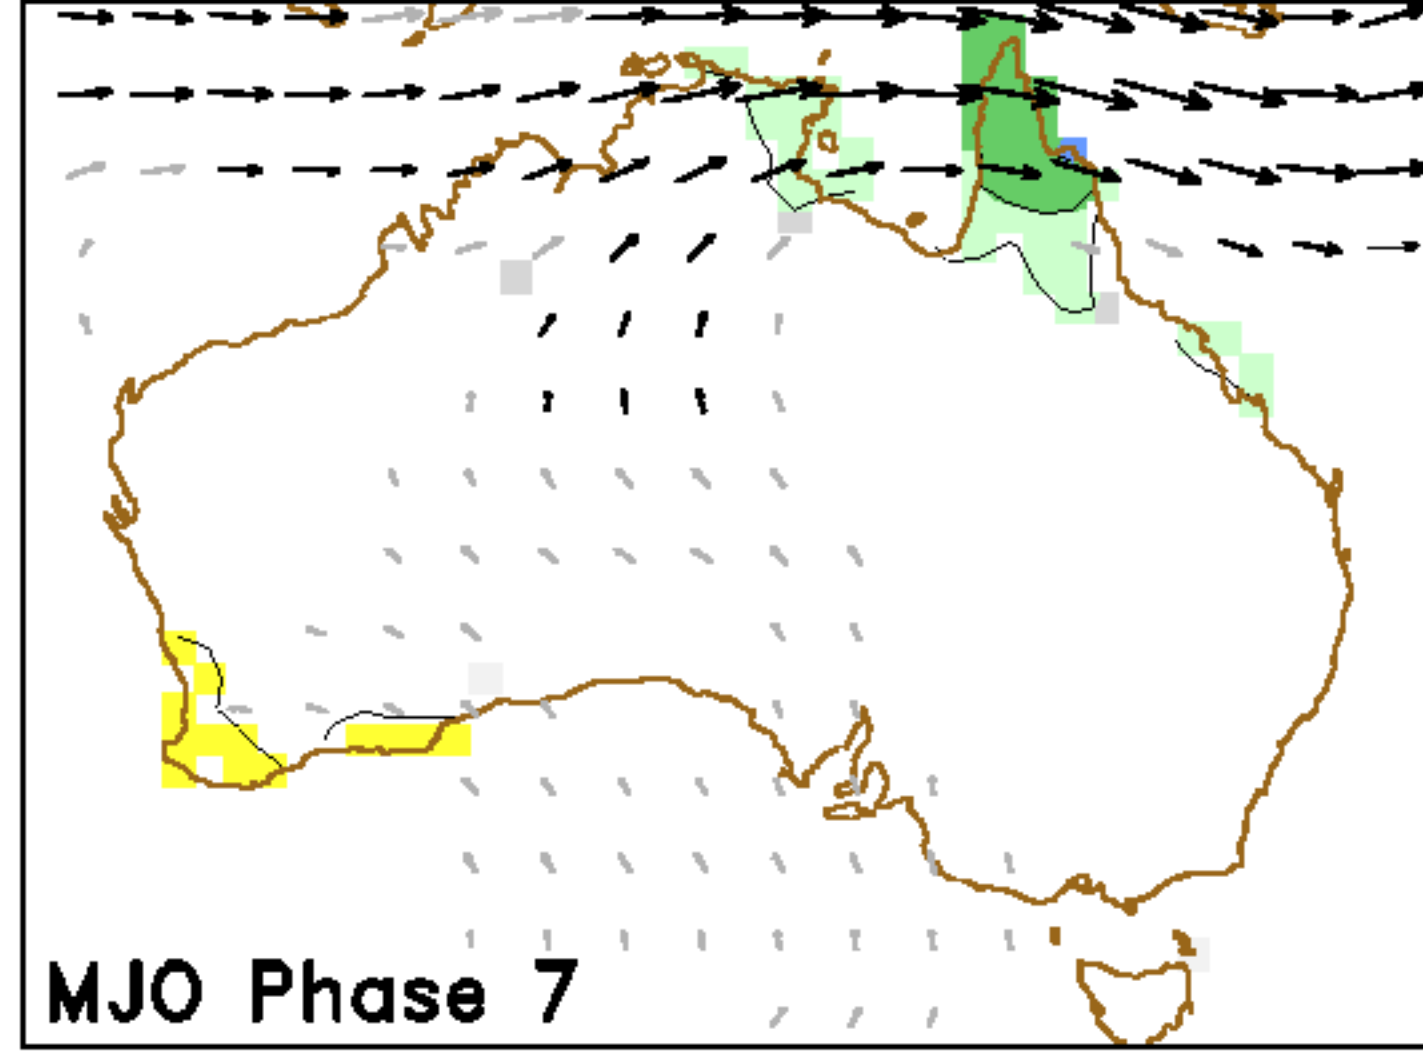

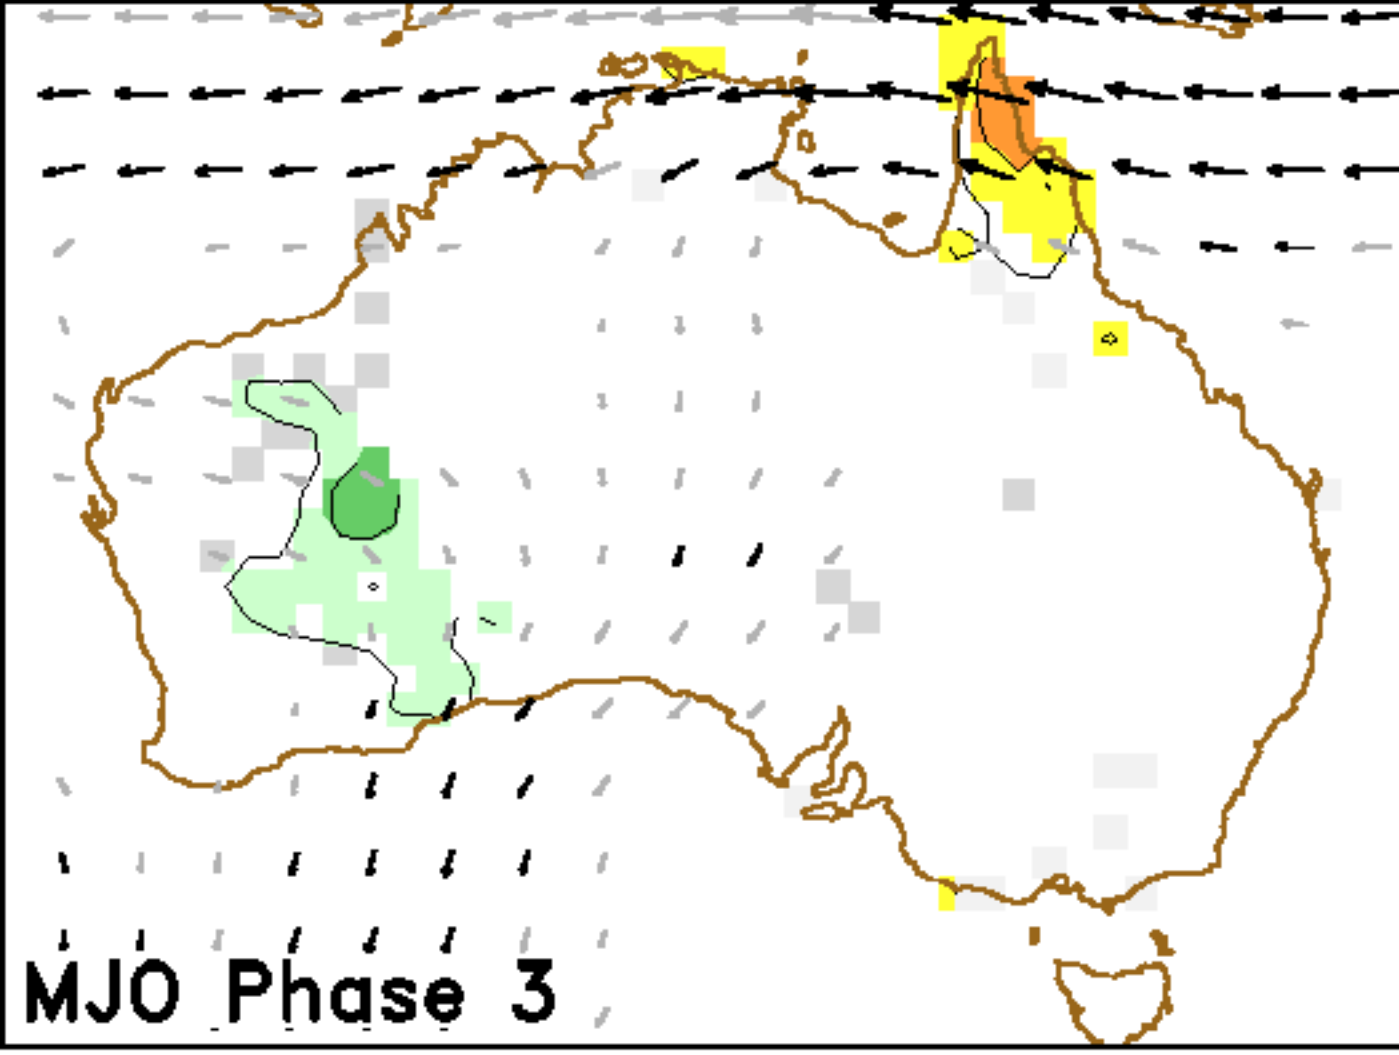

Rainfall odds  
850 hPa wind anomalies

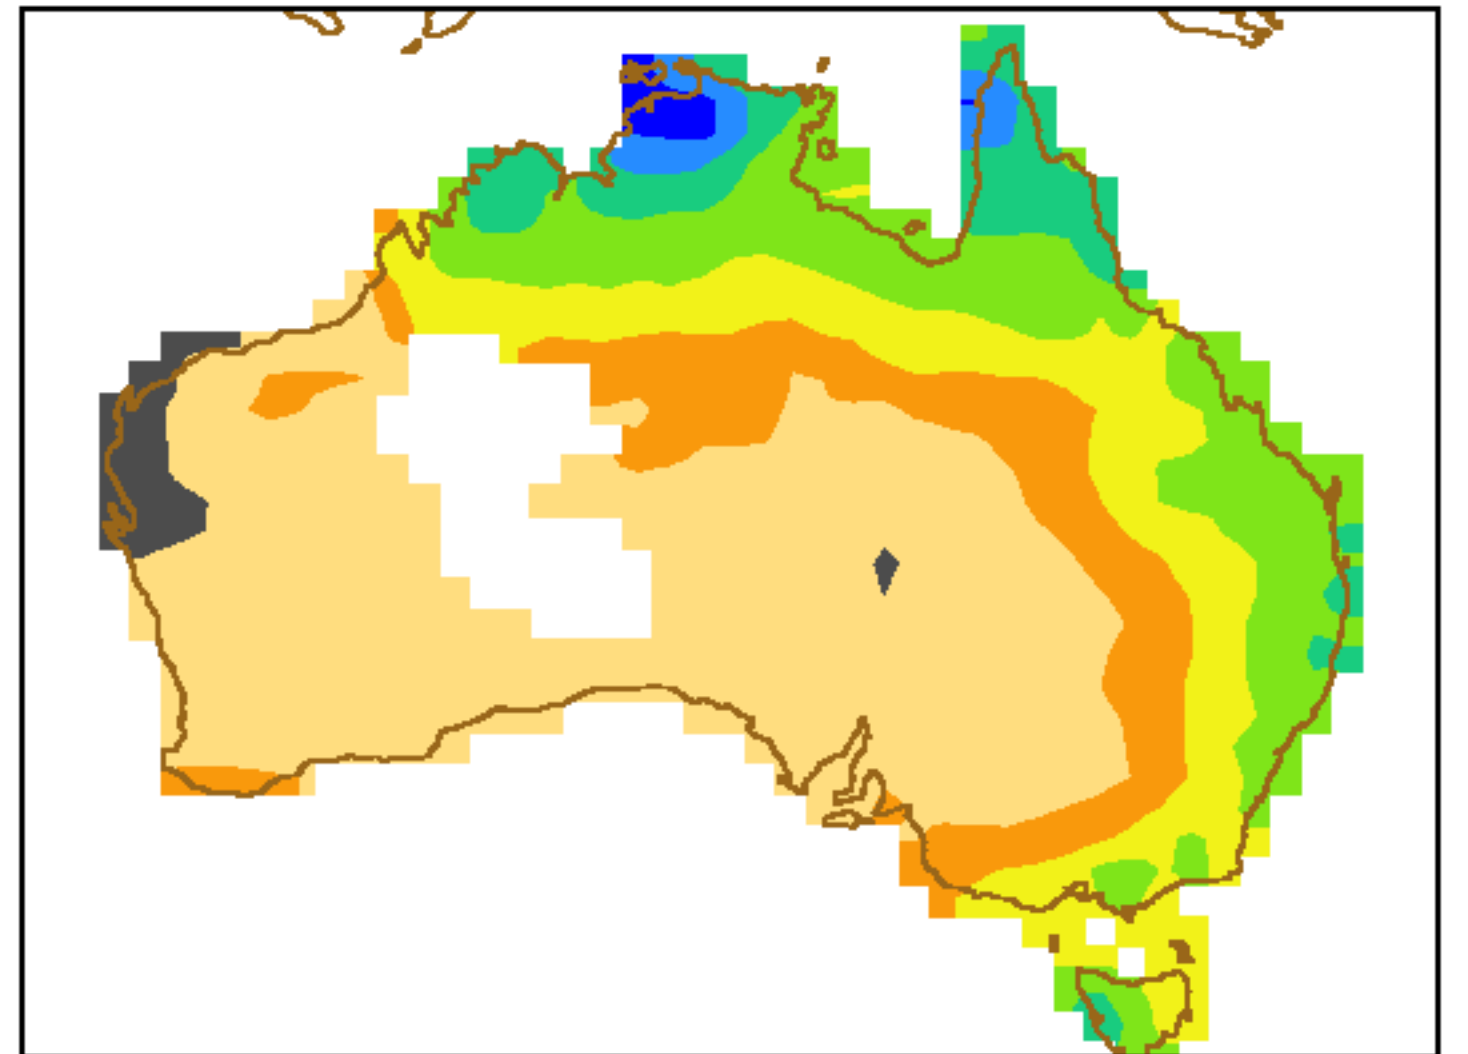

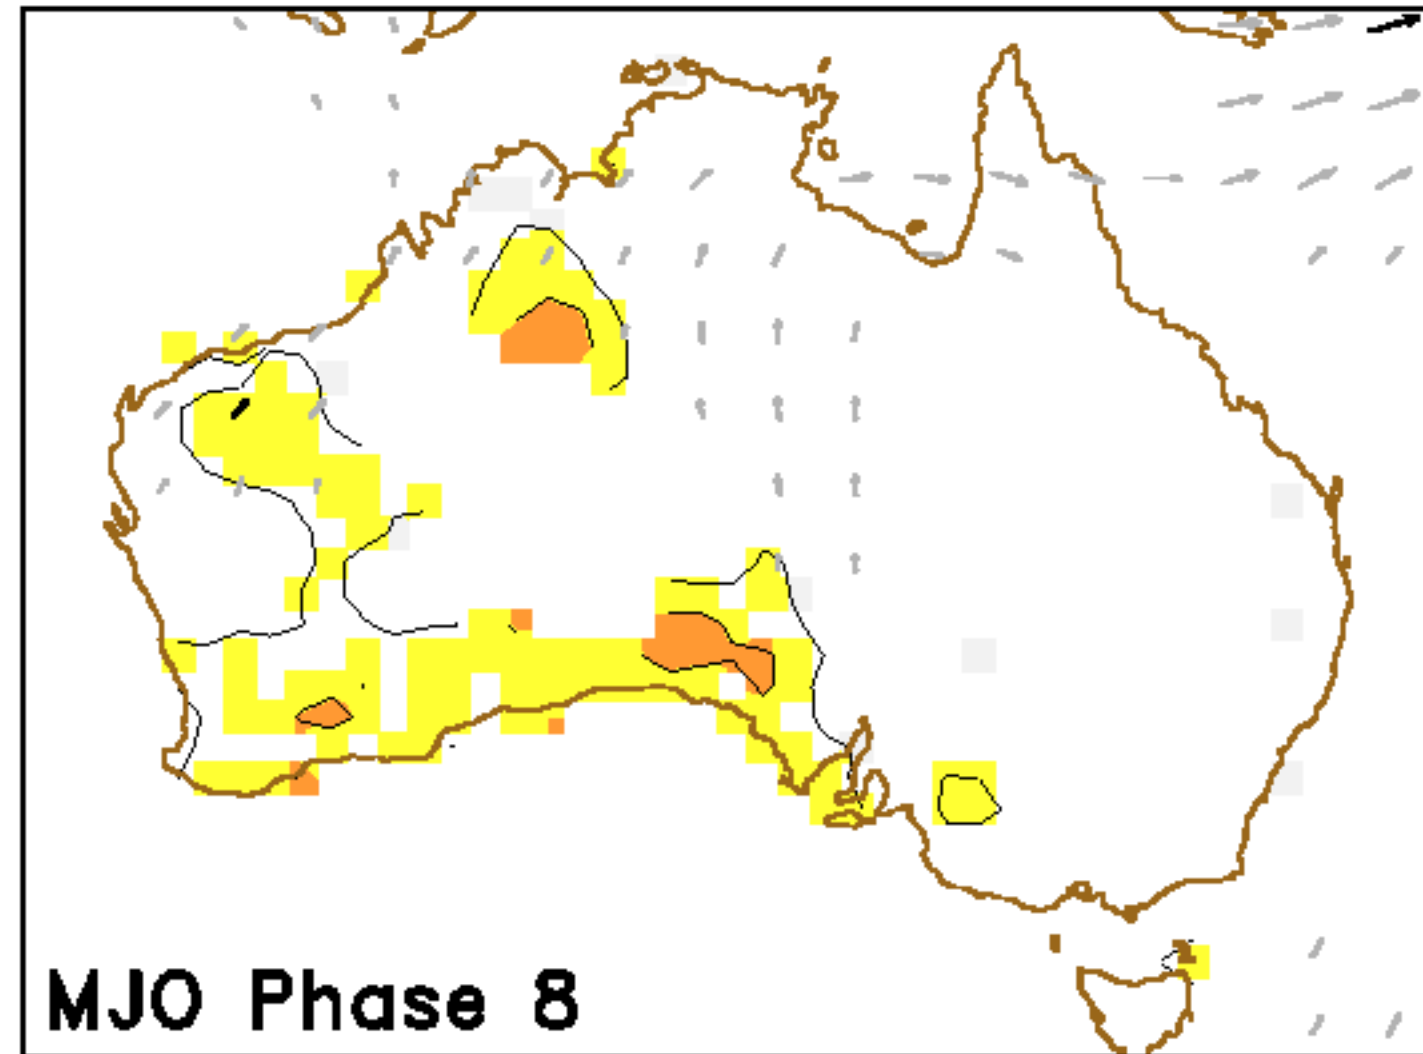

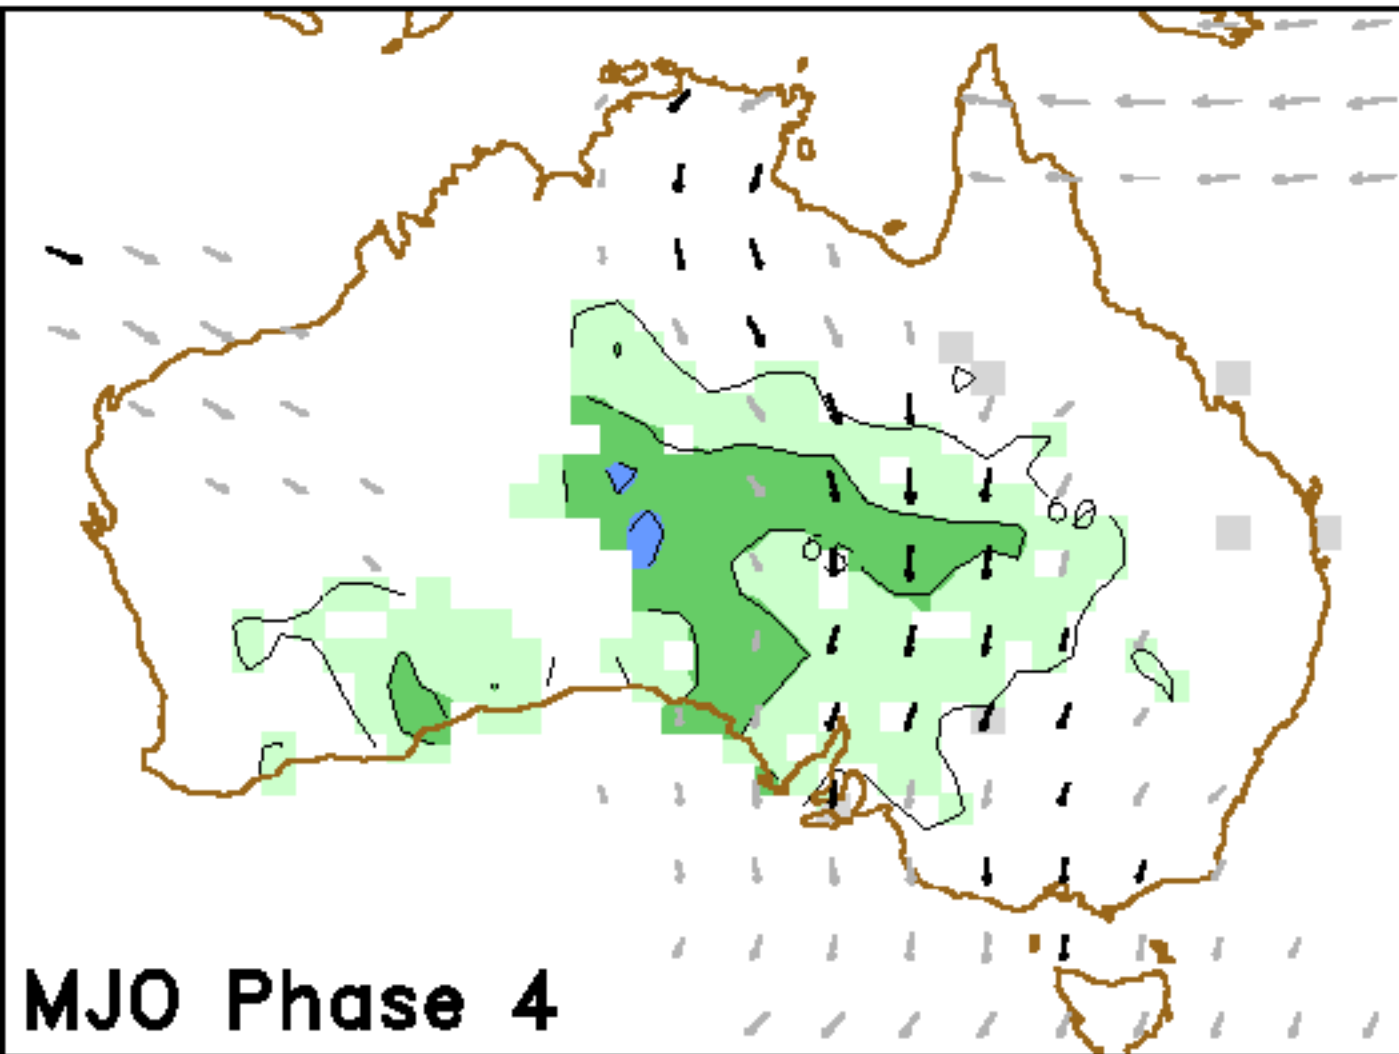

Rainfall odds shown as the chance of weekly rainfall exceeding the median in that MJO phase.

These calculations follow the method provided in the paper Wheeler, M., et al., 2009, Journal of Climate, Vol. 22, 1482-1498.

Shading and vectors only shown where statistically significant.

Australian Government  
Bureau of Meteorology

Chance of exceeding normal weekly rainfall

Normal weekly rainfall in NDJ (mm)
